Profile

Software Developer with strong foundations in Computer Science, Backend systems, and Full-Stack development. Experienced in building scalable applications and solving complex engineering problems.

Education

Sep 2022–Jun 2026 **BSc Computer Science**, *Eötvös Loránd University (ELTE)*, Budapest, Hungary, GPA: 4.7.

Sep 2010–Jun 2021 **High School**, *Russian Gymnasium 40*, Namangan, Uzbekistan, GPA: 5.0.

Work Experience

Oct 2025–Present **Object-Oriented Programming Instructor**, *Eötvös Loránd University (ELTE)*, Budapest, Hungary.

- Teach Object-Oriented Programming in Java to international undergraduate students.
- Cover key concepts including encapsulation, inheritance, polymorphism, interfaces, and SOLID principles.
- Design assignments and hands-on coding exercises to reinforce software engineering fundamentals.
- Mentor students on clean code practices, debugging strategies, and problem decomposition.
- Guide students in Git workflows and development best practices.
- Evaluate coursework and collaborate with faculty to maintain academic standards.

Projects

PeerPrep.

- Built a full-stack study-group platform using **FastAPI** and **React**.
- Implemented real-time chat using **WebSockets** with vector clocks for causal message ordering.
- Designed backend with **JWT authentication**, **Argon2 hashing**, caching, and GZip compression.
- Developed modular architecture using **SQLModel** and **SQLite** for scalability and maintainability.
- [Project Link](#)

Stargate Game.

- Developed an interactive browser-based game using **JavaScript**, **HTML**, and **CSS**.
- Implemented dynamic grid logic and gameplay mechanics.
- [Project Link](#)

Skills

Languages: JavaScript, Python, Java, C#, C, ADA, PHP

Frontend: React, HTML, TailwindCSS

Backend: FastAPI, REST APIs, WebSockets, JWT Authentication, SQLModel

Databases: SQL, PostgreSQL, MySQL, SQLite, Data Modeling

Tools: Docker, Git, Linux

Concepts: Object-Oriented Programming, SOLID Principles, Concurrent Programming, System Design
